

Spellbinding Kalahari • South Africa 2020

11 - 18 November

Join Wildlife Photographer **Hannes Lochner** for an
unforgettable **8 days** Photographic Safari Experience
to the **Kgalagadi Transfrontier Park.**

Open Spaces and Predators of the Mystical Kalahari

During this quintessential photosafari, guests traverse the Kgalagadi Transfrontier Park which is characterised by its red rolling sand dunes, the arid fossil river environment of the predator-rich Nossob River valley, open Acacia savannas, grassy plains and vegetated pans. The park is located largely within the southern Kalahari Desert and straddles the border between South Africa and Botswana. The smell of the first rains, the flowers after the rainy season, the birth of hundreds of springbok and, of course, seeing a big black-maned lion against the backdrop of a red dune. The dry river beds with its multitude of waterholes show predators and antelopes off at a premium and provide excellent photographic opportunities. In addition to the quadrupeds, the birdlife is also spectacular. Sunrise and sunsets in the Kalahari are incomparable and immerse the photographic subject in a magical light. The thunderstorms in summer present an even more spellbinding colour in the sky. Winter shows blue sky for weeks, the climate is pleasant and the air is dry.

The Kalahari is like a lost world tucked into the furthest corner of South Africa and it always delivers. There are no words that fully describe what an exceptional place it is. These are just a few features that draw one to this arid landscape, and for photographers this place is hot and sweaty but also chilly to freezing, but with enough patience, heaven on earth!
